### SKILLS

Javascript, Java, React, HTML, CSS, SASS, Typescript, Python, Node.js, Express.js, Django, Redux

### PROJECTS

#### Allegiance - Full-Stack Web Developer

Oct. 2019 to Nov. 2019

<https://www.allegiance17.com/>

A social network for sports fans to get updated and engage in discussion about their favorite teams with other fans, both locally and remotely

##### React - Redux - Express - Javascript

- Collaborated on a team of 5 full-stack web developers to discuss and deliver stakeholder milestones within 8 weeks
- Streamlined legacy code using Redux to enhance state management for better code readability and easier implementation of websocket integration
- Solely responsible for websocket integration, group management system, user notifications, styling front-end pages, and logging and fixing bugs

#### Trip Splitter - Back-End Developer

Sept. 2019

<https://bd-trip-split.herokuapp.com/api/docs/>

A web app for tracking trip expenses and calculating how much each traveler owes to each other

##### Typescript - Express

- Collaborated on a team of 3 front-end developers and 2 marketing page designers as the sole back-end developer to deliver a MVP within 5 days
- Solely responsible for all back-end development, including setting up an API, writing and deploying API documentation for reference by the front-end developers, creating an automated testing suite, and ensuring models returned by the API matched front-end needs and expectations

#### Safe Routes - Front-End Developer

Aug. 2019

<https://safe-routes-bw.netlify.com/>

A web app and data analysis collaboration project that visualizes data about New York City traffic accidents for a specified time period in order to visualize patterns and route safety

##### React - Javascript - Google Maps API

- Collaborated on a team of 3 front-end developers, 3 data scientists, 1 back-end developer and 2 marketing page designers as a front-end developer to deliver a minimum viable product within 5 days
- Solely responsible for front-end integration between data science back-end and Google Maps API visualization
- Led 2 junior front-end developers and managed communications between front-end, data science, and back-end teams

### EMPLOYMENT

#### Lucky Plenty

Co-Owner

Riverside, CA

Sept. 2018 to Current

- Sort, package, and ship over 100 monthly online orders
- Manage company finances to target budget goals and manage company inventory/products to ensure stock integrity
- Collaborate with domestic distributors and suppliers to gain new inventory or market new products
- Collaborate with Amazon on behalf of the store as part of the third-party seller platform

### EDUCATION

#### Lambda School

May 2019 to Mar. 2020

Full Stack Web Development and Computer Science 2020

Lambda School is a 9+ month Computer Science & Software Engineering Academy that provides an immersive hands-on curriculum with a focus on computer science, web and mobile development, UX design, and data science.

#### University of Florida

Aug. 2011 to Aug. 2015

Bachelor of Science Statistics 2015
